

SOBER DRIVE PRO

Rev.3.Oct.19.2006

Build Jack Orman's **Overdrive PRO** on this layout. "At the request of the members of the Stompbox Forum, I have created this versatile high gain overdrive. It was made by combining the following circuit fragments: input gain stage is the Muffer, followed by the IC gain stage of the Fat Gnat, a tone control from the Fender Pro Roc amp and the output buffer of a TS-808! High gain boutique sound at its best, though not a clone of any existing pedal." **Jack Orman**. ©**Jack Orman**. Check <http://www.muzique.com/> for other great projects. Off board components except for the potentiometers are not shown on the layout. Trademarks are property of their owners.

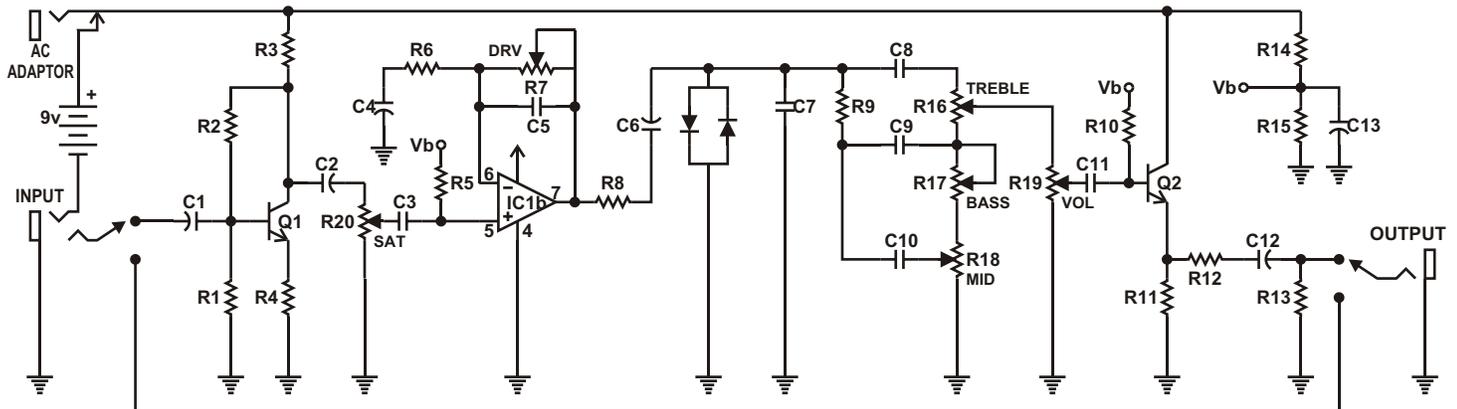

LAYOUT

Parts List

Resistors	R12 - 100ohm	Capacitors	C11 - 0.1µF
R1 - 100k	R13 - 10k	C1 - 1µF	C12 - 10µF
R2 - 470k	R14 - 10k	C2 - 1µF	C13 - 22µF
R3 - 10k	R15 - 10k	C3 - 0.022µF	Diodes
R4 - 150	Potentiometers	C4 - 1µF	D1 - 1N914
R5 - 100k	R7 - 100k lin pot	C5 - 100pF	D2 - 1N914
R6 - 100ohm	R16 - 50k lin pot	C6 - 4.7µF	Transistors
R8 - 1k	R17 - 50k lin pot	C7 - 0.0022µF	Q1 - 2N5088
R9 - 22k	R18 - 2k lin pot	C8 - 270pF	Q2 - 2N5088
R10 - 470k	R19 - 1M log pot	C9 - 0.47µF	IC's
R11 - 10k	R20 - 100k log pot	C10 - 0.22µF	IC1 - TL072
